

OLMEK

Secrecy Management

Olmek is an innovative solution developed by Item Centric to protect digital data's storage and exchange with an unprecedented level of confidentiality and security, while seamlessly integrating into existing IT environments

Digital data is vulnerable to:

- Economic, financial and industrial spying
- Internal hacking
- Theft or loss of hardware (eg: notebooks)
- Hardware failure
- Copy of server contents, storage mediums
- Attacks, blackmail and money extortion

3 main functionalities:

- Confidential data management
- Instant and secured sharing of file of any size and type
- Nomadic secured access from anywhere via the Internet

Olmek : Confidential Data Management

- Olmek's specific file's treatment
- Symetric key (from 128 to 256 bits)
- Asymmetric RSA key (from 1024 to 4096 bits)
- Total encryption (client and servers)
- All files are signed

Olmek : Instant and Secured Sharing of File

- Sharing by encrypted links
- Only the recipient can view the shared file
- No email server (no more spamming or phishing)
- No size limit and any type of file
- No viral forwarding of encrypted links
- Automatic receipt of downloading

Olmek : Nomadic Secured Access from Anywhere via Internet

- Light non-intrusive software (.exe or DLL)
- All proxy management (basic, NTLM, SSO ...)
- All networks (LAN, Wifi, GPRS, 3G ...)
- No need to carry any file
- No foot print of viewed files

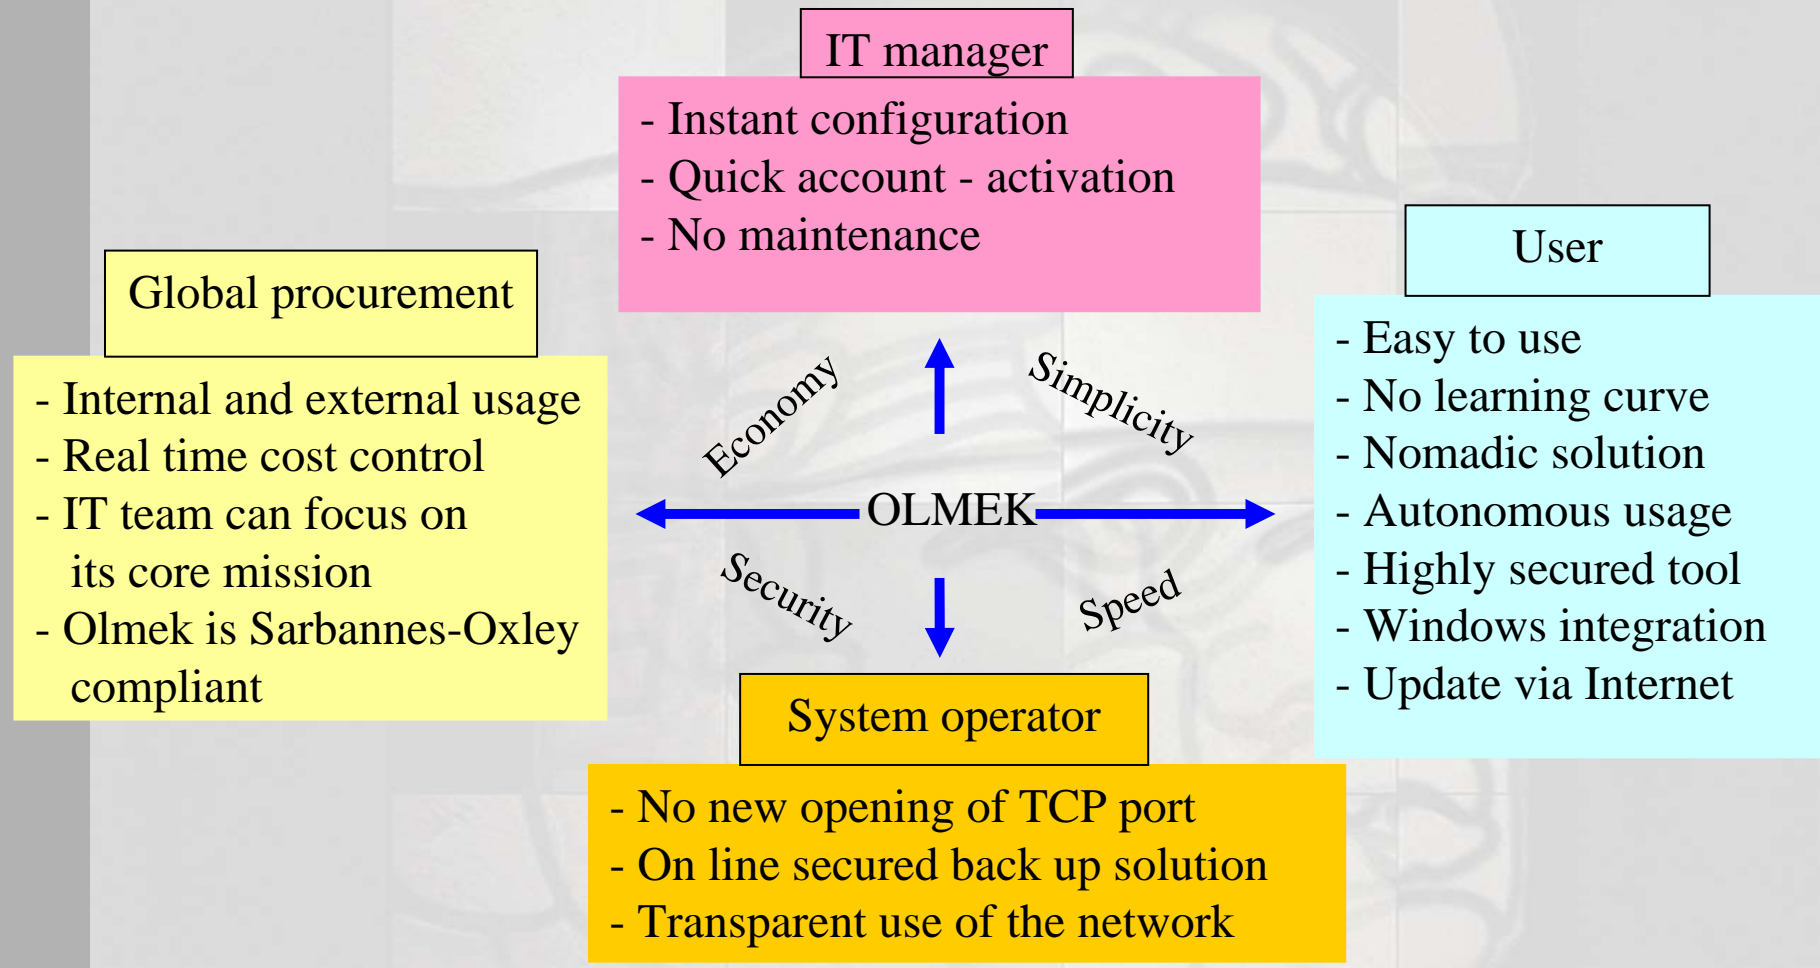

Olmek : full integration and original fonctions

- Olmek's interface similar to Window's Explorer
- Windows (98 to XP SP2) and Pocket PC
- Automatic file versioning
- File's comments
- Easy non automatic file's sharing
- Real time notification for any shared file
- Any sharing can be cancelled

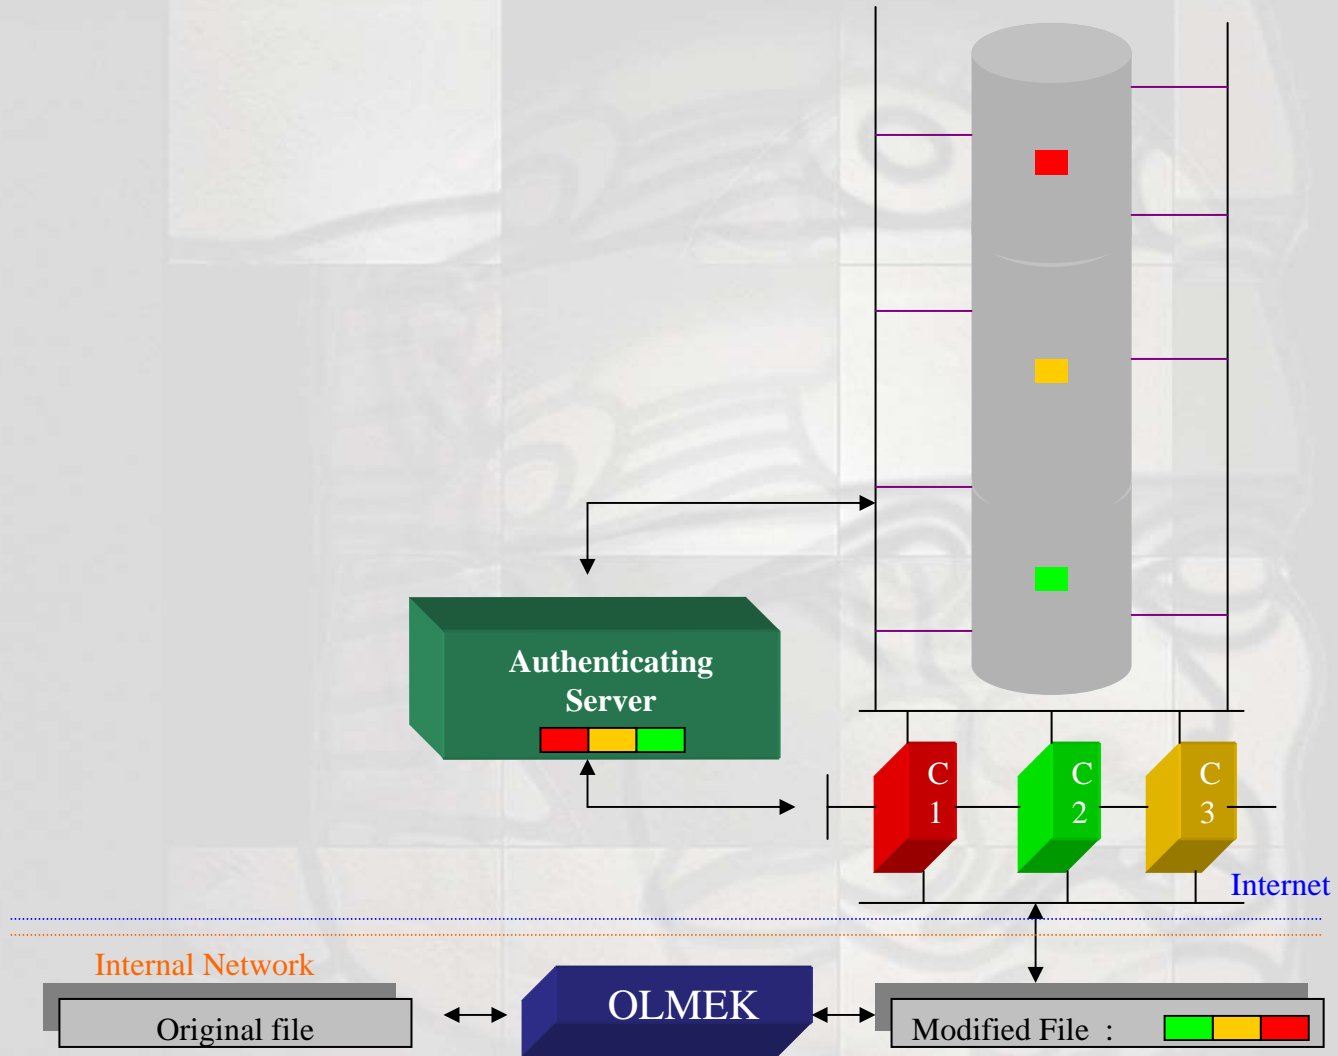

Olmek Complies with Companies' Requirements

Olmek : Current Developments

- Secured Push e-mail
- Olmek secured and decentralized Directory
- Olmek Messenger (confidential online chat)
- Olmek Offline (DRM)
- Olmek Linux version

Thank you for your attention

The Olmec civilization (1500 BC - 150 AD) is the oldest one known in South America. This civilization is at the origin of many innovations: storage, underground hydraulic networks, task specialization, the first writing and counting by means of dots and bars. It also left behind colossal stone sculptures.
